Insect Screen System

Pleated Mosquito Nets

Innovative screening solution for french doors & Large openings. Pleated screen can be operate effortlessly. There is no retracting force remains at any required location. Stored away into protective housing when not in use that keeps the mesh clean, invisible and safe from potential damages.

You can innovate mosquito screening solution for windows, doors, French doors or large openings with pleated Mosquito Net solution for windows and doors.

Pleated Mosquito Nets System as mosquito nets for windows are decorative yet clearly visible and can be operated effortlessly by children and elderlies without any sophisticated technique. No retracting force is required to open or close the window insect screens. Stops at any required location and the screen can be stored away in protective housing when not in use that keeps the mosquito mesh for windows clean, invisible and safe from potential damages.

Barrier Free Pleated Mesh Doors

This innovative product for French and large opening doors offers smooth functioning easy to operate without any hassle or retracting force and closed tightly with magnetic locking top and bottom scorpion tails retract into the side bar while the screen is open and stretched in open position to support the mesh at the bottom. No return spring is included, thus opening/closing is easy even for kids and elderly persons. Pleated net is made of 100% polyester waterproof and offer complete protection and long lasting. It allow to cover wide openings as it can be used as 1/leaf 2/ leaves screen by joining leaves consecutively thus covering up to 7.8 mts width with double retracting systems.

Lower track is of ABS Plastic and thickness about 5 mm thus facilitating the smooth passage for everyday use and also wheelchair accessible and makes the cleaning easy

Mesh Colour: black and grey color

Mesh Size: 20 mm

Screen can be replaced in case of damaged without replacing the entire system. The special plastic clips allow users to remove the screen from the casing for cleaning or storage in the winter season.

Sleek Openable Frame

Sleek Mosquito Frames are ideal for French doors & large openings. Space saving & enables you to use your entire space . With smooth operation guided by track profiles in additional capable of two , three four or more panes.

Slim line frames fits on the face of the exciting window frame can be hinged or held in place with simple turn buttons , enables the screen to be open / close in the same way as a window allows . The frame can also be easily removed is required simply by lifting it off the hinges for cleaning or you may simply prefer to store the screen when not in use.

Slimline Aluminum frames fits on the surface of the existing window frame can be hinged or held in place by turn buttons with mid bar, which are screwed to the window frame and rotate into position across the face of the screen frame..

Each frame requires two hinges to fix. Hinge assembly consists of two parts, held together with a central pin, which allows for quick removal.

The hinges are attached to one side of the screen frame, and one part is fixed to the mosquito net for windows.

To hold the screen upright turn buttons are fixed to a particular window frame such as mosquito mesh for windows on the opposite side to hold the screen in the closed position.

This fixing enables the screen to be opened in the same way as a window allowing the screen to be partially open/close. The mosquito nets for windows frame can also be easily removed if required simply by lifting it off the hinges for cleaning or you may simply prefer to store the screen when not in use.
